1:45-2:15	Break
2:15-2:45 2:45-2:55 Q & A	Jennifer Houghton, Boundary Forest Watershed Stewardship Society - <i>The New Forest Act & How to Get There</i>

[The Power of Forests](http://www.boundaryforest.org) project is bringing together diverse partners to ensure forests on BC 'public land' are protected by law so that nature's needs such as biodiversity, ecosystem function (including the provision of quality water), wildlife habitat, and climate mitigation are prioritized over corporate interests. We are people in BC who are trying to protect our homes and communities from the negative impacts of industrial forestry. With the massive loss of primary (never logged) forest due to industrial forestry, communities are at risk. We're facing more drought, fire, and floods. The new Forest Act proposal is intended to stop the land from becoming any more degraded from industrial forestry than it already is.
